Quex

Unparalleled Exposure Management

EVERYTHING ELSE IS OLD TECH.

Risk carriers of all sizes, at every point in the chain, deserve better exposure management technology.

Quex from Quotech is underwriter-designed to do the job properly, and built to eliminate the pain points.

It's the ultimate generation of property exposure management tools.

A RICH WEALTH OF DIRECT THIRD-PARTY DATA

inputs, including Disaster Aware Enterprises (perils) and Tensorflight (risks), enhances risk knowledge and understanding to fine-tune the accuracy of PMLs.

MULTIPLE, ENDLESSLY FLEXIBLE USER-DEFINED REPORTS

can be structured, scheduled and automated for any frequency of delivery by anyone, to anyone, to provide unparalleled timeliness and flexibility.

OASIS OPEN EXPOSURE DATA STANDARDS

(OED) allow the ultimate in data compatibility, minimising or eliminating translation and ingestion challenges.

LIGHTNING-FAST CALCULATION

means the impact of new exposures is assessed in seconds.

UNLIMITED LOCATIONS

can be analysed and shown on a map (not just 500) to effortlessly assess even the largest portfolios.

LIVE PORTFOLIO MONITORING

(limited only by the currency of the risk information uploaded) delivers an **instant snapshot** of

- Overall exposure
- Portfolio-wide impacts of a live catastrophe event
- Diversification benefits or penalties of an individual risk presented
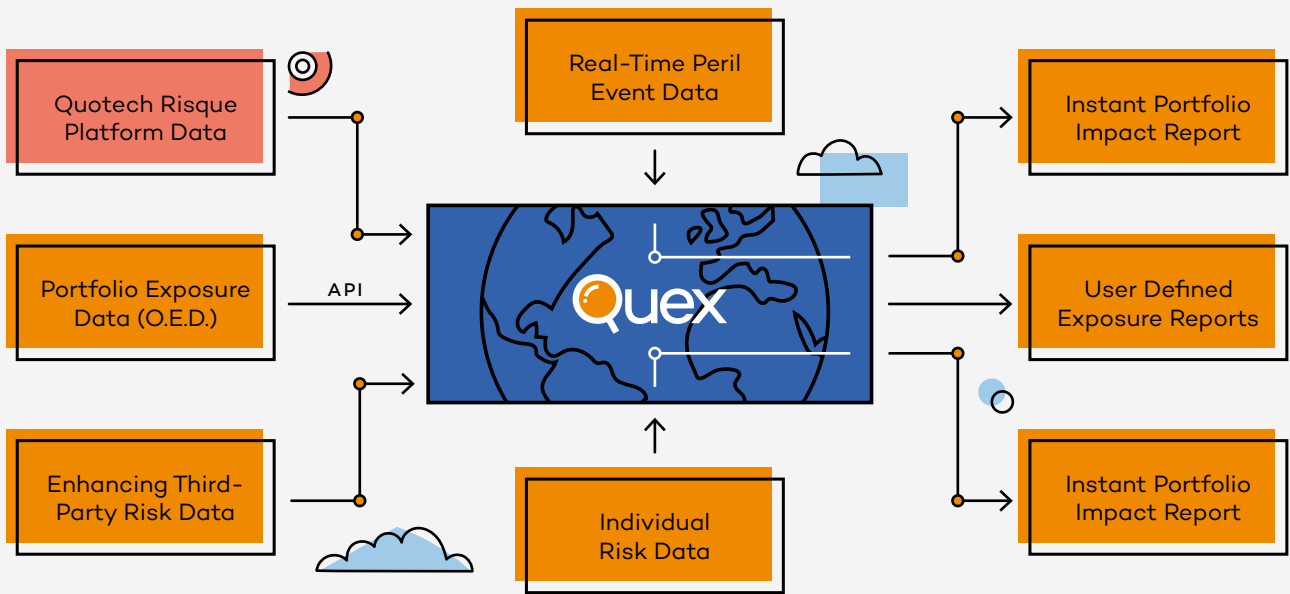

EASY UPLOADS

make data ingestion instantaneous and automatic, or at least incredibly simple

- Instant upload for Quotech Risque users
- Instant upload via API, or
- Simple CSV file upload

Quex: Unparalleled Exposure Management

Quotech

We're underwriters first ourselves, so we already know where it hurts, and we built the system working closely with clients. They told us what they wanted their exposure management system to do (and especially what their incumbent systems don't do), then we built one that does.

Quex lets you react faster, improve efficiencies, lower loss ratios, and reduce administrative costs. Everything else is obsolete.

Quotech Risque Platform Data	Real-Time Peril Event Data	Instant Portfolio Impact Report
Portfolio Exposure Data (O.E.D.)	Quex	User Defined Exposure Reports
Enhancing Third-Party Risk Data	Individual Risk Data	Instant Portfolio Impact Report
